Nils Breer

9. August 2023

AG Albrecht

- working on plotting scripts
- experienced same bug as Giulia in options file (constraint not registered)
→ test how much impact it has, run new alignments
- running more alignments on warm SciFi run 269045 to find the exact uncertainty where $\chi^2 / \text{dof} = 1$
 - Tx first; find the others with respect to Tx
- non-alignment stuff: proceeding correction for flavourphysics students
